Summary

I'm a versatile backend developer with a passion for crafting exceptional user experiences. Currently excelling at Getir, I work on gateway service, ensuring seamless interactions across mobile and web platforms. I've thrived in international agile teams at PiA, contributed to a USA-based startup Compelis, and started to back-end development at Corebit Tech during my last year of university. My tech prowess spans Node.js, Spring Boot, MongoDB, AWS, and more. Let's connect and explore how my expertise can drive innovation.

Experience

Back End Developer
Getir

Nov 2022 - Present (10 months)

I am an integral part of the fast-paced world of Getir, a dynamic company specializing in rapid delivery services across Europe and America. At Getir, we redefine convenience by bringing everyday necessities and grocery shopping right to your doorstep within minutes. My role is centered around the gateway service, a pivotal junction that ensures the seamless functioning of both mobile and web applications. I orchestrate the user experience across diverse touchpoints, including dashboard interactions, shop details, and product pages. This dynamic responsibility allows me to contribute significantly to enhancing user satisfaction and streamlining the digital convenience that Getir embodies.

Back End Developer
PiA (People in Action)

Aug 2020 - Nov 2022 (2 years 4 months)

I have worked in an agile-driven international team. Design, develop and maintain microservices for multi environments. Created Restful APIs for the use of millions of people. Primarily worked on Vodafone-Spain and Vodafone-Albenia projects.

Software Developer
Compelis

Jun 2020 - Aug 2021 (1 year 3 months)

I have been In charge of maintaining, developing, and evolving software using test-driven development in a USA-based startup. Built the best competitor intelligence software on the market for the billion-dollar e-commercial market.

Back End Developer
Corebit Tech

Sep 2019 - Jun 2020 (10 months)

In my last year of the university, I developed, troubleshoot, debug, test, and implement website code.

Software Test Engineer
Aselsan

Jul 2019 - Sep 2019 (3 months)

I used Abstract Syntax Tree with Regular Expression and C++ for pre-compile syntax and logical tests for all other code components of the company.

Education

İzmir Katip Çelebi Üniversitesi

Master of Science - MS, Computer Software Engineering

Feb 2023 - Jul 2024

Dokuz Eylul University

Bachelor of Engineering - BE, Computer Engineering

Sep 2016 - Jun 2020

Kyungpook National University

Bachelor of Engineering - BE, Computer Science

Jan 2018 - Jun 2018
